

6009hs Tetrakem Satin FS Antimicrobial

Directions for use

Application conditions

Temperatures should be over +5 °C, but under + 25 °C, air humidity below 80 %.

Painting instructions Remove dirt and dust from the surface to be painted. If required, clean the surface with Maalarin tehopesu. Fill holes and cracks with a suitable ready-to-use filler or 1027 Tetrakem Fire Secure mastic adhesive before painting. Apply 1–2 times as required, with either a roller, paintbrush or spray gun. Use appropriate protective gear and protective clothing during the painting job.

Liability clause The information on the FT card is based on laboratory tests and practical results. All test results are indicative. As we cannot influence the application conditions and working method, we are only responsible for the quality of the paint, which we guarantee is in accordance with high quality requirements and the certificate. We are not liable for any damages caused by the incorrect use of the product against the directions for use, or if used for an inappropriate purpose.

Environmental protection

Any unused liquid paint should be delivered to a collection point for dangerous waste. Empty, dry paint vessels can be delivered to a recycling depot or, if this possibility is not available, to a landfill.

Application safety The composition of the product does not require any safety labelling. There is a separate safety data sheet available for the product.

Flammability Non-combustible.
